POINTS WHEN YOUR SNAKE DIES AT LENGTH

len 3 0	len 4 0	len 5 1	len 6 2
len 7 4	len 8 6	len 9 10	len 10 15
len 11 20	len 12 25	MAX 13 30	

At MAX (13): the snake stops growing — each food eaten instead scores **+10 points now** (a +2 food = +20).

SCORE TRACK

0	10	20	30	40	50	60	70
80	90	100	110	120	130	140	150

HOW A ROUND WORKS

1 • Program 2–6 cards face-down in a row (left = first move). The instant the first player locks, start the **15-second timer**; everyone else must lock when it ends.

2 • Reveal & resolve one slot at a time, all snakes together: clear your tail, slide your head 1 cell, check crashes, then eat.

▲ **ARROW** move 1 ⬆ **BOOST** slide 3 (discard the card)

Food +1 or +2 length (new pieces behind the head). **Boost token** draw 1 or 2 boost cards.

Crash (wall / any body / two heads to one cell) = death. Flip **every other** segment to your bounty food (worth ×2), score your length above, then respawn next round on any **3 contiguous empty cells** — head not facing food.

Win: first to the target score ends the game; every living snake then banks its current length and the highest total wins.
