

TRACK YOUR LENGTH — POINTS BELOW ARE BANKED WHEN YOU DIE AT THAT LENGTH

At MAX (13): no more growth — each food scores +10 points instantly (×2 food or bounty = +20).

ROUND IN BRIEF

Program 2–6 cards face-down (left first). Arrow = move 1 · Boost = slide 3 (discard the card). First lock starts the **15-sec timer**.

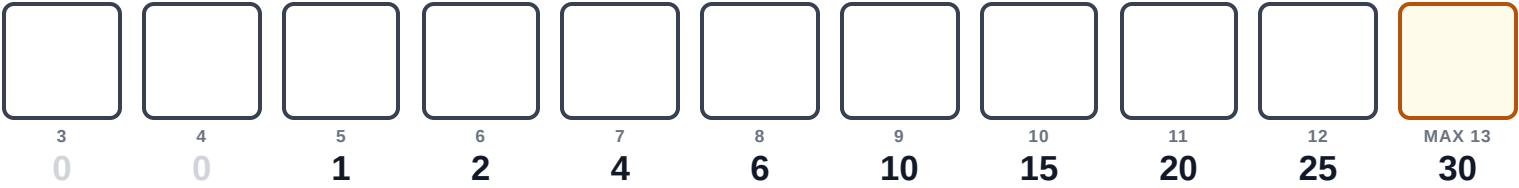

Resolve each slot: boosts slide first (cell by cell), then all arrows step together. Same square, same moment = both die; hitting anything sitting still kills only the mover.

Tokens: food +1 grow · ×2 food +2 grow (each also +1 energy) · ×2 energy +2 energy. Energy = boost cards. Bounty chips = +2 grow, +1 energy.

Death: bank your length (above), flip every other segment to bounty, respawn next round on any 3 contiguous empty cells (head not facing food).

Win: first to the target ends the game — every living snake then banks its length; highest total wins.
